Managing Used Light Bulbs for Recycling

Light bulbs and fluorescent lamps contain toxic chemicals, including elemental mercury, that are harmful to both people and the environment when disposed of improperly. The **Lamp Recycling Mailback Solutions** offered by Sharps Compliance allow for safe and compliant recycling of these materials.

We have mailback solutions for:

- ▶ 4' and 8' Straight Fluorescent
- ▶ U-Shaped Fluorescent
- ▶ Compact Fluorescent Lamp (CFL)
- ▶ High Intensity Discharge (HID)
- ▶ High Pressure Sodium
- ▶ LED
- ▶ Incandescent

Multiple size options available: Boxes and pails to meet your specific lamp needs.

When these bulb/lamp mailback systems are received back from customers, all of these lighting materials are disassembled, and the component parts are segregated and managed for recycling. These mailback systems meet federal and state requirements for compliant Universal Waste management.

Lamp type not listed here or too many lamps for a mailback?
